### FTST-4 (joiner)

Suits 2.7-4.0mm wire  
600kg max tension  
150 units in bulk pack

FTST-2

FTST-1

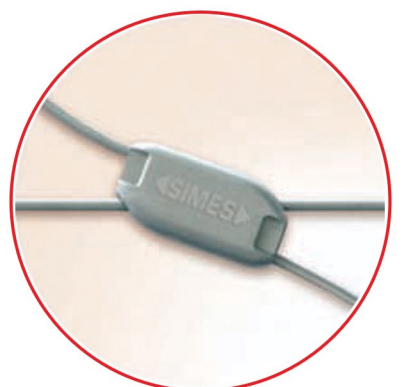

FTST-4

---

The SIMES wire joiner is made from 100% durable steel including the specialised roller mechanism which allows the wire to move in one direction only. The ZAMAK (Zinc, Aluminium, Manganese and Copper) steel rollers are highly resistant to the corrosive effect caused by chemicals and fertilisers. The SIMES wire joiner is designed to reduce the time and workload when joining or applying the ideal tension to fencing or trellis wires.

Based in Pamplona, Spain and known world-wide as a leading manufacturer of professional nail, staple, ring-staple and bonding products. Made up of a highly dynamic team, the SIMES company is today considered as one of the strongest companies in the fastening sector.
